EQUIPMENT

Therco-Serck, at the heart of the UK's high quality manufacturing industry

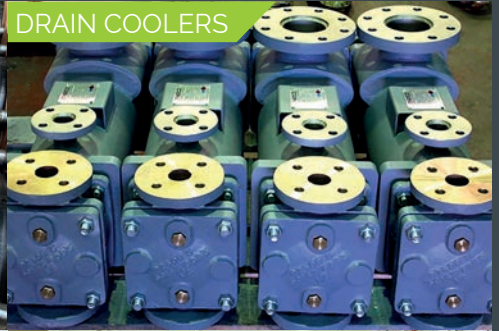

CHARGE AIR COOLERS

FUEL OIL COOLERS

DRAIN COOLERS

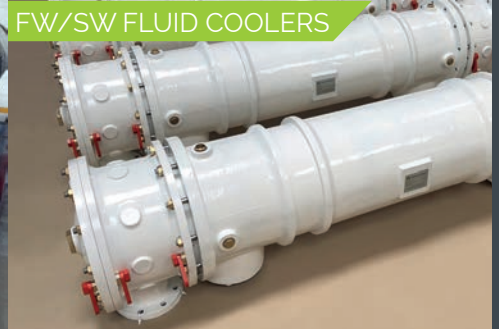

HYDRAULIC OIL COOLERS

LUB OIL COOLERS

FW/SW FLUID COOLERS

In association with ADI, Therco-Serck produces like for like replacement coolers, tubestacks, spares and sealing kits for the full range of Serck oil, water and air cooling equipment.

Using its archive of over 500,000 drawings dating back to the 1940's, Therco-Serck can trace these coolers from serial, part or NATO stock number data only, without any need to see the existing equipment.

This level of remote traceability also helps facilitate a responsive, worldwide OEM repair and overhaul service, coordinated from a central location in Sheffield, at the heart of the UK's high quality manufacturing industry.
